Dear colleague,

Are you feeling apprehensive about the future of your lab software? Are you feeling trapped in a software relationship and unsure how to reposition your business?

It's time you knew the facts about lab management software.

-  Optical Software is the best choice for a long term software technology partnership.
-  OMICS V6.01 is the most sophisticated lab management solution available with calculations second to none, real-time inventory control, exclusive lens selection logic, job flow process management, incredible device interfaces, and so much more! We dare you to compare!
-  The OSI Partner Program provides an excellent low risk opportunity for progressive thinking laboratories to reposition with OMICS for long term stability, performance and advanced functionality.

For a limited time **Optical Software** will provide the **OMICS** lab management solution to any laboratory free of charge with a qualified enrollment in **Optical Software's Partner Program**. An information pamphlet is enclosed detailing the many benefits and value added services of this powerful program.

Weigh the facts and make a mission critical decision today! Partner with Optical Software and experience lab management software in a whole new way. For additional information and pricing on this exciting offer contact sales at **336-707-7542**, email **sales@omics.com** or visit our web site **www.omics.com**.

Kindest Regards,
Jodi Nickerson
Vice President, Sales
